- 1 Visual vocabulary**
Familiarize yourself with certain wireframe standards such as those for images, video, and drawing attention to certain areas.

- 2 Logos & Branding**
Logos will usually be represented the same way as images, a box with a "X" through it, and a text description inside. Grayscale or low fidelity logos may be placed in the wireframe for certain situations.

- 3 Color**
Other than links possibly being colored differently, most color and visual design elements are left for the later visual design stage.

- 4 Hierarchy**
The importance or hierarchy of the information on the page is created by using headings, most often bold or heavier weighted text, of different sizes and location.

- 5 Links**
Links are represented most often as blue, underlined text. Links may also be a different color, keeping in line with a particular visual design direction.

- 7 Layout**
All of the elements listed above, keeping in mind whitespace, readability, and hierarchy, collectively make up the overall page layout.

- 6 Text**
Text in the wireframe will either be represented by actual copy, or by placeholder text such as Lorem ipsum, sometimes referred to as "greeking".
